

E SERIES CRANK+ STRAIGHT DESK

Enhance workplace connectivity and performance

Elevar Crank+ is a range of manual height adjustable frames with a difference!

FEATURES AND BENEFITS

Most manual crank frames change height very slowly and don't go to a height suitable for anything other than sitting. Not the Crank+!

You can get from bottom to top in only 38 turns on the straight desk and twice as fast as other desks on the 3 leg frames! The maximum height is 1105mm with a 25mm top – suitable for standing height operation for most users.

Backed by a 10 year warranty on frame and mechanical components and available in straight, 90° and 120° frames in Silver and White, the Elevar Crank+ becomes a new standard for manual height adjustable frames.
